

# Commuter Rail Maintenance Facility

The CRMF site is located on the Fox North site at 48th Avenue and Fox Street, just northwest of I-25 and Fox Street, just northwest of I-25 and I-70. During the SEA public comment period, affected business owners and employees expressed concerns about potential economic and employment impacts that could result if Owens Corning (one of the impacted property owners) decided to cease operations rather than to

proceed with the federal relocation process. In response, RTD modified the site design in four different ways as shown below. This site layout will still allow RTD to meet the operational requirements of the maintenance facility, but will not require RTD to purchase as much of the Owens Corning property. As a result, the Owens Corning operations are anticipated to stay on site.
